

# Functional Magnetic Resonance Imaging (fMRI)

Peter A. Bandettini, Ph.D.  
National Institutes of Health  
[bandettini@nih.gov](mailto:bandettini@nih.gov)

# Magnetic Resonance Imaging

Water: **42 MHz/Tesla**

**1.5 Tesla = 63 MHz**

**3 Tesla = 126 MHz**

**7 Tesla = 294 MHz**

# Magnetic Resonance Imaging (MRI)

Sensitive to:

- # of protons ( $H_2O$ )
- Magnetic environment
  - Tissue structure

# Magnetic Resonance Imaging

# Magnetic Resonance Imaging

# Magnetic Resonance Imaging

# MRI Images with Different Contrast Weighting

# Two Types of Neuroimaging

- Structural/Anatomical Imaging
- Functional Imaging

**Fiber Track Imaging**

**Venography**

**Anatomy**

**Angiography**

**Perfusion**

# •Functional Imaging

–Xenon Computerized Tomography (Xe CT)

–Positron Emission Tomography (PET)

–Single Photon Computed Tomography (SPECT)

–Functional MRI (fMRI)

–Electroencephalography (EEG)

–Magnetoencephalography (MEG)

–Transcranial Magnetic Stimulation (TMS)

*Passively viewing words*

*Listening to words*

*Speaking words*

*Generating verbs*

# MRI vs. fMRI

MRI

one image

high resolution  
(1 mm or less)

fMRI

many images  
(e.g., every 2 sec for 5 mins)

low resolution  
(1.5 to 4 mm)

August, 1991

**1991-1992**

**1992-1999**

# Alternating Left and Right Finger Tapping

# Alternating Left and Right Finger Tapping

# Topics Studied with fMRI at the NIH

- Epilepsy
- Visual processing
- Mood disorders
- Learning
- Habituation
- Plasticity
- Motor Function
- Auditory processing
- Attention
- Language
- Speech
- Stroke
- Social Interaction
- Development
- Aging
- Genetics

# fMRI Setup

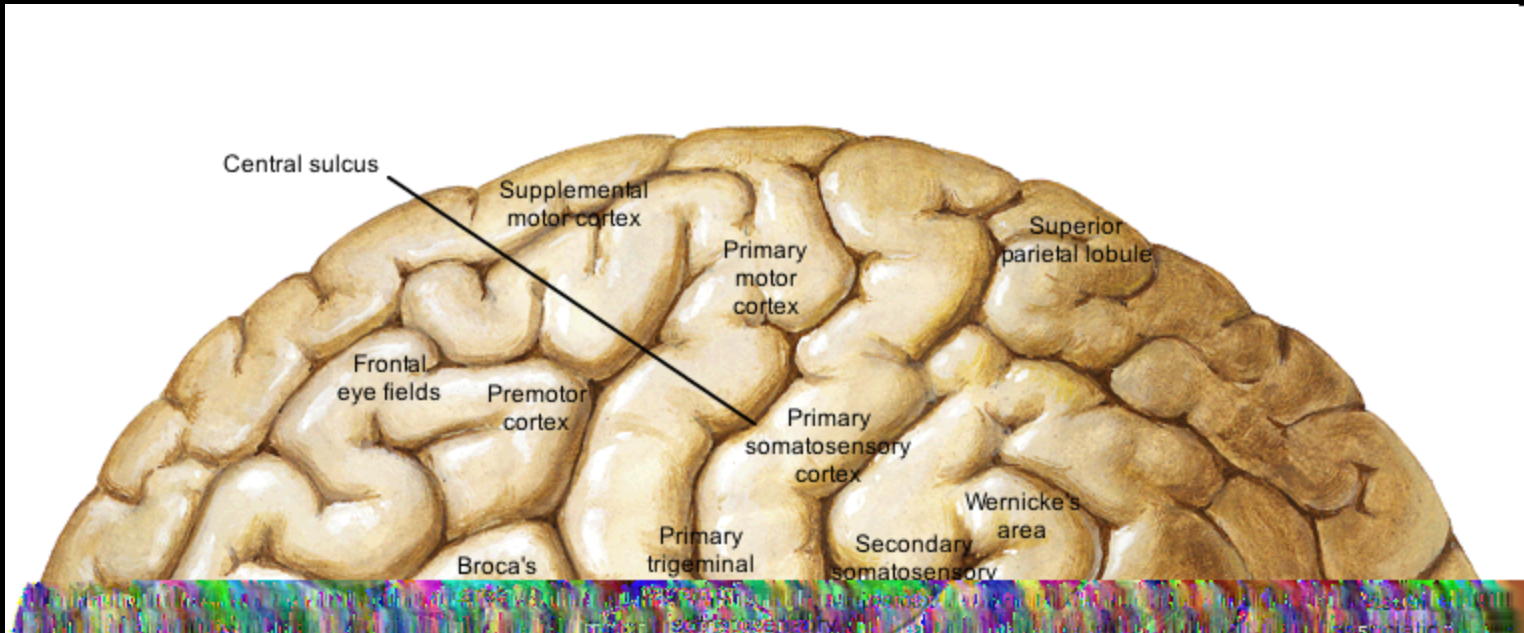

# A typical day at the MRI scanner

Peter T. Fox,<sup>5</sup> and Jia-Hong Gao<sup>5</sup>

(a) Digit Memory Task

(b) Autobiographic Memory Task

**Figure 1.**

Functional maps. Normalized activation brain maps averaged across five subjects demonstrating the statistically significant activations ( $P < 0.01$ ) in the faking memory impairment condition with the activation for making accurate recall removed when perform-

ing on forced choice testing using (a) Digit Memory and (b) Autobiographic Memory tasks. Planes are axial sections, labeled with the height (mm) relative to the bicommissural line. L, left hemisphere; R, right hemisphere.

**electric  
current**

**magnetic  
field**

**intracellular  
current  
(dendrite)**

**MEG:**  
intracellular  
current

**EEG:**  
extracellular  
current
